This system has two types of users as Customer who uses the fleet system and Admin who manages the fleet system.

Customer:

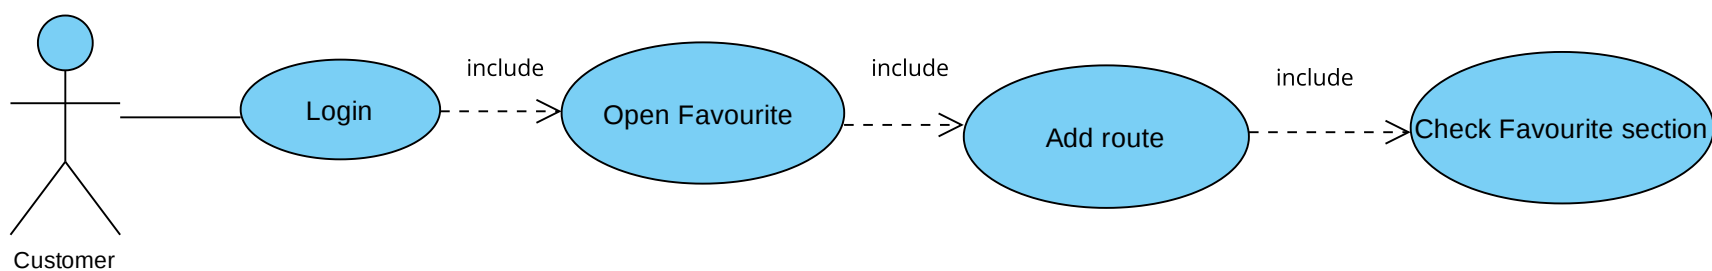

- Customer must register to use this system.
- Customer must enter valid login information, or the system throws an error.
- Customer can see the card information such as how much money left, card usage history.
- Customer can see only those cars are busy or not.
- Customer can make a reservation. The system allows only empty time spaces.
- Customer can see information about her/his past reservations, such as the route was from what point to what point, how long did it take, how much money did it cost.
- Customer can add his/her favourite route.
- Customer can update/delete his/her reservations.
- Customer can see how much is left for his/her reservation in the Alert(messages) section. And can see messages from Admin.
- Customer can send message to Admin and can score for route.

Admin:

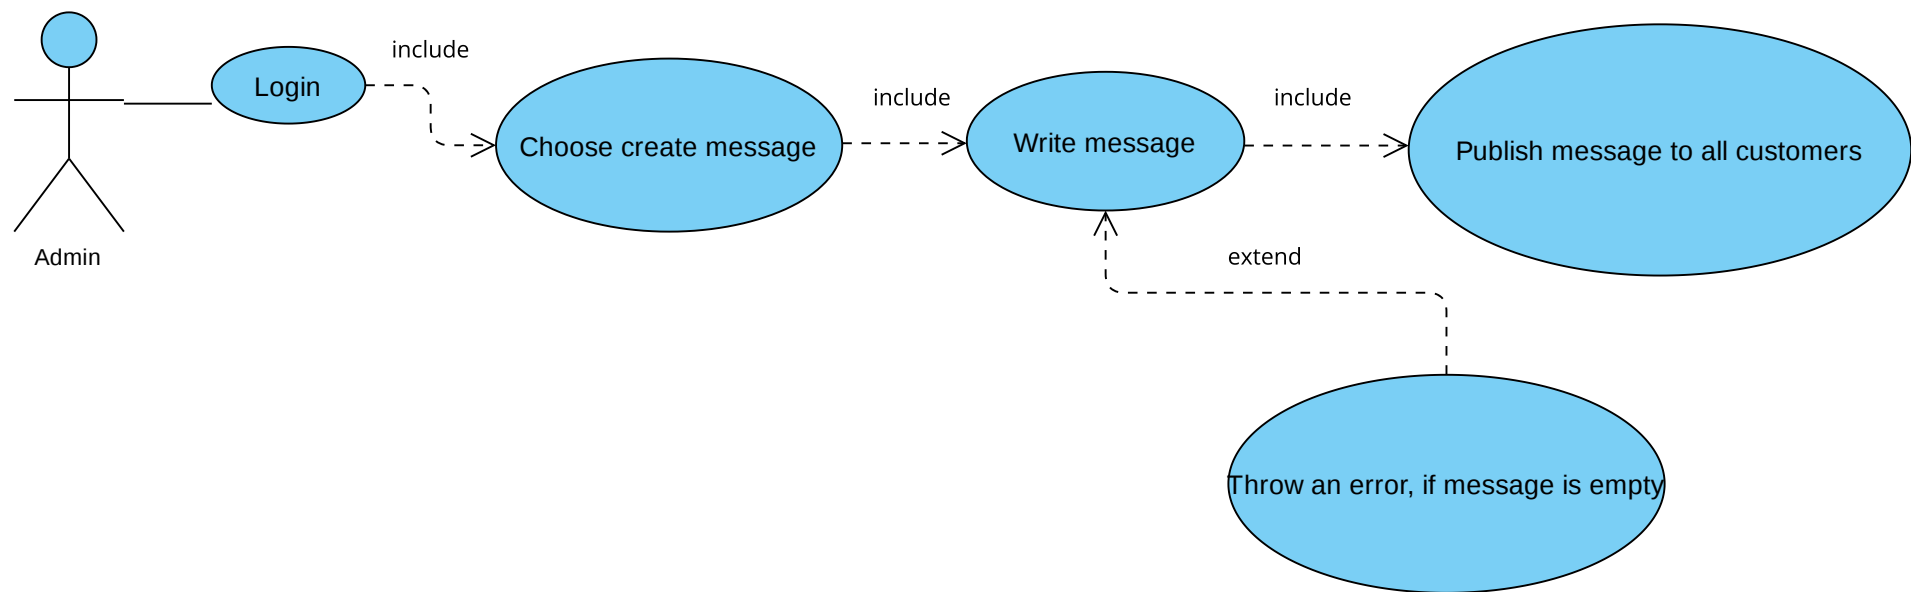

- Admin must enter valid login information, or the system throw an error.
- Admin can see the cars information, such as where are the cars, how long the battery left in the car.
- Admin can see the revenue of the fleet.
- Admin can delete the reservation.
- Admin can send messages to all Customers by Alert section.
- Admin can search cars by ID.
- The system sends messages to Admin, if there is an error about car. (Less battery)
- Admin can see all reservation statistic with customer ID and car ID.

Admin see car statistics after searching

Login Part

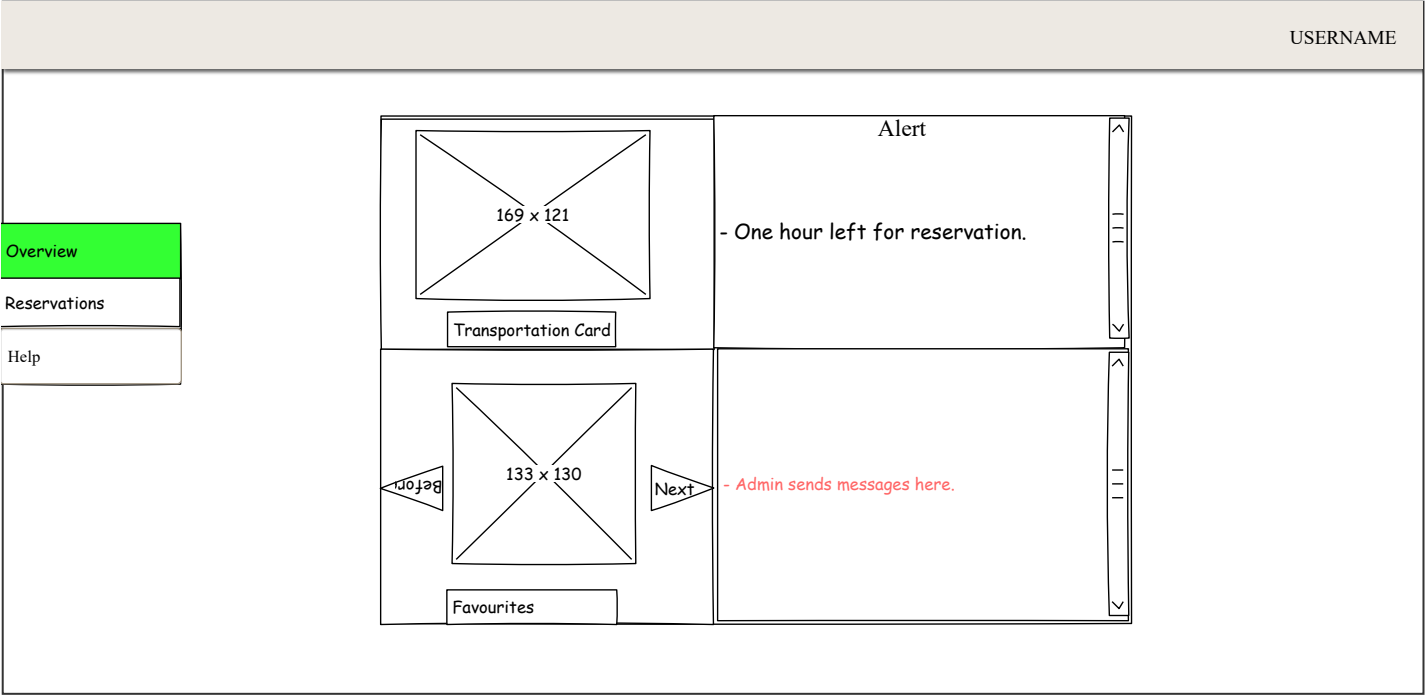

A login form mockup on a light gray background. It features two input fields for 'Username:' and 'Password:', each with a small white rectangular input area. Below these fields are two buttons: 'Login' and 'Signup', both with a light gray background and a thin border. To the right of the input fields is a large, empty white square with a blue border, likely a placeholder for a profile picture or logo.

Customer Signup

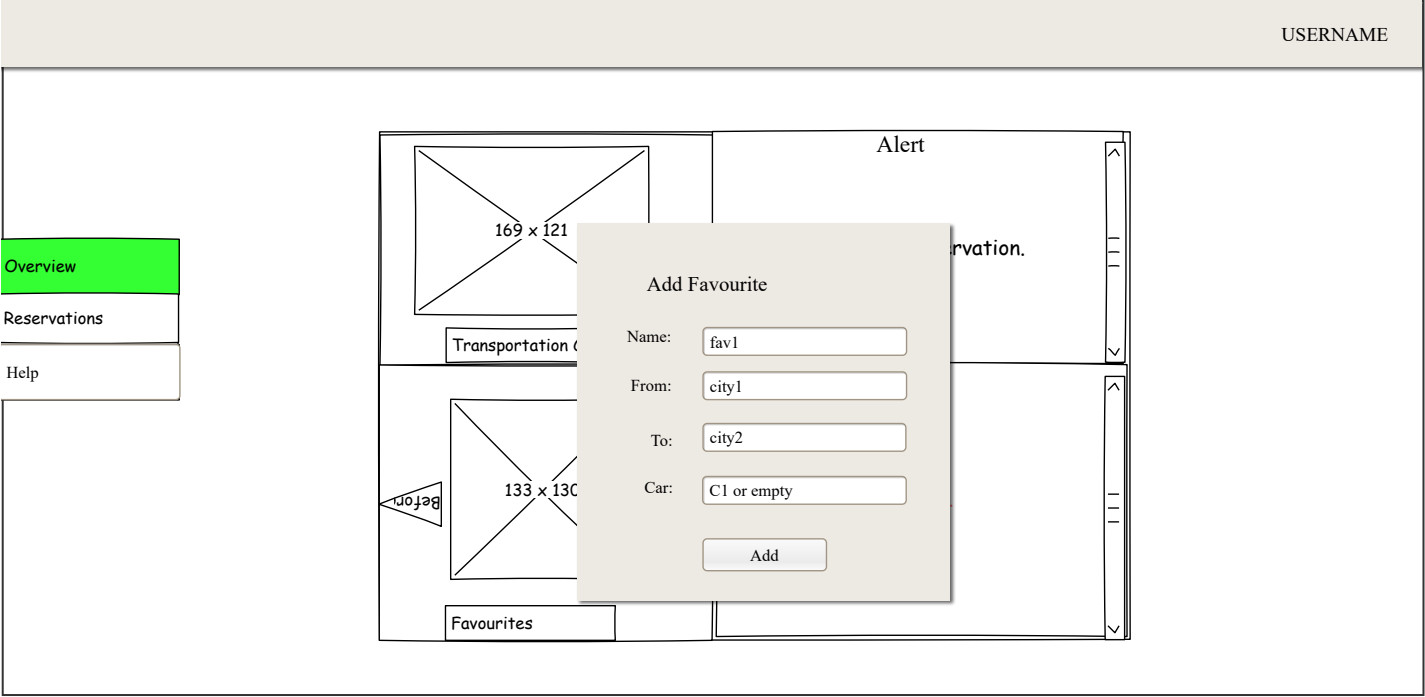

A customer signup form mockup. It features a light gray background with a 'Signup' modal window overlaid. The modal window has a title bar with a red 'X' button. Inside the modal, there are four input fields: 'Name:', 'Username:', 'E-mail:', and 'Password:'. The 'Password:' field is filled with '*****'. Below the modal, there are two buttons: 'Login' and 'Signup', both with a light gray background and a thin border. To the right of the modal is a large, empty white square with a blue border, likely a placeholder for a profile picture or logo.
